## ***THE TASTE OF NATURE***

For many people, the words “maple syrup” and “maple sugar” kindle fond memories of quieter, simpler times when old fashioned values prevailed. In the early days, making quality maple syrup using traditional methods and simple tools, involved a great deal of hard work. At Mapleside, we’ve tried to build on those traditional values.

***OUR WOOD-FIRED EVAPORATOR***

## ***THE MAPLESIDE SHANTY***

Our old-style shanty takes you back to those times. We still use a wood-fired evaporator to make our premium quality Canadian maple syrup.

Come visit our “sugar bush” and learn how the Ontario’s first agricultural crop is harvested and processed. Take a walk in the maples and see the “maple shanty” where the syrup is made every spring.

## ***OUR BUSIEST TIME IS MARCH, APRIL, MAY***

Nature provides the change of season in the spring that stimulates the maple sap-run, and brings us our busiest time of the year.

Stop in by chance or by appointment to observe nature’s harvest. See how the sap is collected and transferred to the shanty for boiling.

While you’re here, shop for pure Canadian maple products to share with friends and family.

In the off season, call to set up a visit to tour our facility or shop for pure Canadian maple products.

You can also place an order by phone or by e-mail:
